Entering Anesthesia on Treatment Page

80 TDO KB November 26, 2025 New User resources 4.77K

Overview

How to enter anesthesia on the Treatment Page.

Detailed Instructions

Open the patient's **Treatment page.** Click the **"Anesthesia"** button at the top.

Select the Qty, Type, and name of Anesthesia given. The tooth and date fill in automatically.

If a Quantity or Type of Anesthesia is not showing in the drop-down list, you may add it by clicking the + button

This information can be entered faster by using the **autofill** buttons at the bottom.

A summary of all anesthesias given is entered as a patient note automatically. Any deletions or changes are also documented in the notes, as well as in the ***Deleted Anesthesia*** *report*
