The form may also be opened directly from the Premed form by right clicking on the autofill combo box and selecting ‘Edit List.’
Enter a name for the autofill and then the corresponding information including the medication, dosage and number.

This information is used in the Pre Med Documentation located on the treatment pages if premedication is needed as well as from the ‘**Main Data**’ menu on the top menu bar and selecting ‘**Premed**.’

You may have as many premed auto fills as you wish.
