Storing Important Software Information in TDO

208 TDO KB October 26, 2021 Program Setup 5.07K

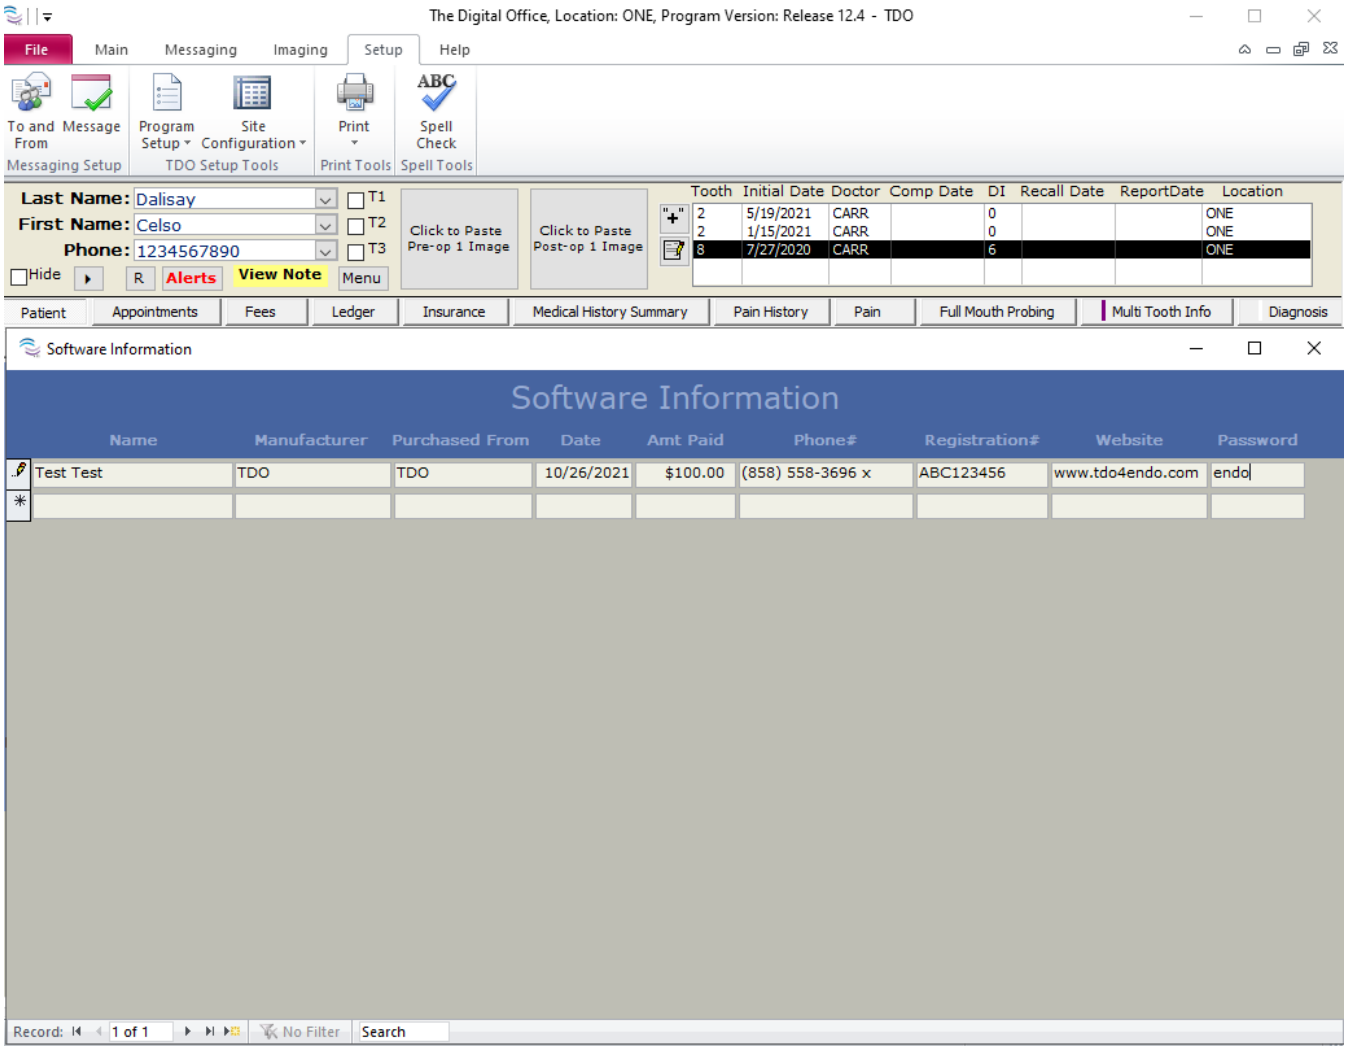

Overview

TDO has a section where you can store information about your software purchase, for your own records, called "Software Information"

To Open Software Information

To open the form, navigate to **Setup>Site Configuration** on the top menu bar, then select **Software Information.**

This is a great place to keep all information on software you purchase. By keeping the information here you would have all of your registration numbers and contact numbers easily accessible.
