Default Probing options

214 TDO KB December 3, 2025 New User resources, Program Setup 8.16K

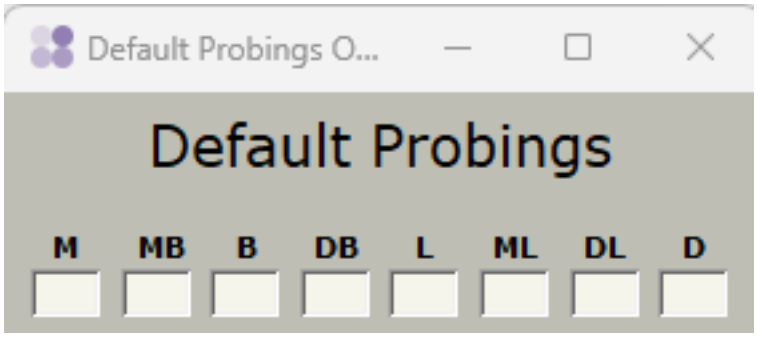

Overview

How to set default probing for multi-tooth info page

Detailed Instructions

The probing values that are entered when the ‘defaults’ are selected are customized under the **Default Probings Options** form.

This can be accessed by clicking **Program Setup – Default Probing Options** on the top menu bar.

These defaults are used on the Multi-Tooth Info page and the individual tooth testing page.
