

Clinical Findings at this Visit

239 [TDO KB](#) December 1, 2025 [New User resources](#), [TDO software](#) 5.81K

Overview

On the right side of the patient **Note** page, there is a **Clinical Findings at this Visit** section.

The screenshot displays the TDO software interface. At the top, there are tabs for Case Presentation, Treatment, Final Report, Notes to Front, Letters, Prescriptions, Recall, Notes, Surgical Diagnosis, and Surgical Treatment. Below these, a 'Filter' section shows 'Tooth/Patient: Private: Administrative Hidden:'. The 'Current View' is set to 'All', with 'Show' buttons for each category. The main area contains fields for ID#, R Date, and Tooth #. A red arrow points to the 'Clinical Findings at this Visit' section on the right, which lists various clinical findings with checkboxes for selection. The findings are organized into two columns: Asymptomatic, Improved but slightly tender, Intermittent pain, Constant pain, Initially asymptomatic with recent pain, and Initially painful but now asymptomatic in the first column; and Temp sensitivity, Swelling reduced, Swelling, Palpation soreness, Percussion sensitivity, Sinus tract present, and Sinus tract healed in the second column.

Detailed Instructions

This is an optional section; however, it is an easy way to document clinical findings for each appointment.

When entering a note for the patient's visit, click the findings that apply. The items you select will automatically be included in the patients note.
