

Referral Chat

319 [TDO KB](#) February 24, 2026 [Cloud Ribbon Menu](#), [New User resources](#), [Replica](#), [Setup](#), [TDO services](#), [Troubleshooting](#) 13.67K

Overview

With **TDO Cloud**, there is a Referral Chat feature that allows your Referring Doctor to communicate with you or someone in your office.

Requirements

TDO Cloud Services

The workstations utilizing Referral Chat must not be logged in with the same TDO username. If they are logged in with the same username, the messages from the web will display **ONLY** on the first TDO Chat that receives the message.

If you want to be logged in at different locations at the same time, you must use different login accounts.

Detailed Instructions

Go to **Messages** in TDO and select **Referral Chat** to open the Referral Chat window to ensure someone in the office is available for any Referring Doctor who wishes to chat. This window must be open on at least one workstation for Referral Chat to function.

This window can be minimized (or moved over if you have a big monitor) at any time to allow you to work in TDO.

If minimized, you will see a 'flower' icon (TDO icon) on the taskbar.

For your Referring Doctors:

Have your referring doctor log in to the **Referring Doctor** login area on your Website.

Referring Doctor's Area

Doctor ID:

Password:

What is 10 + 10? [?]

[Login](#)

[Do you want to become a referring doctor?](#)
[Forgot your login information?](#)

This area is secured using 256 bit encryption. The same encryption is used by the banking industry.
 To verify, you should see a padlock to the left or right of the address bar at the top of the browser, or on the bottom right corner of your browser.

Once logged in, you will see a **CHAT** tab.

Search for a Patient

After clicking on the **CHAT** tab, the Referring Doctor will be able to see who is available to chat.

Referring Doctor's Area

Select a staff member
to chat with:

endo

Have them select the **Staff Member** they want available to chat with, and the **Chat** area will appear on the screen.

Referring Doctor's Area

Select a staff member
to chat with:

endo

Start typing the message in the box at the bottom.

Referring Doctor's Area

The screenshot shows a web interface for a Referring Doctor's Area. On the left, there is a light blue box with the text "Select a staff member to chat with:" and a button labeled "endo". To the right of this box is a chat window titled "endo" with a close button (X) in the top right corner. The chat window contains a message "Good Morning!" at the bottom, with a small upward arrow icon next to it.

To submit the message, hit the **Enter** key on the keyboard, and the message will appear at the top of the **Chat** area.

Referring Doctor's Area

This screenshot shows the same interface as the previous one, but the chat window now displays the message "Me: Good Morning!" in red text at the top. The "endo" button on the left remains visible.

How this will appear in TDO:

Once the Referring Doctor sends the message, the TDO “Chat” window will pop up on the screen with the Referring Doctor’s message.

Note: There may be multiple chat sessions with different referring doctors.

To reply to a specific Referring Doctor's message, please click on the 'dropdown' button to select the Referring Doctor's name (just in case there are multiple chat sessions with different Referring Doctors) and start typing your message.

Click **Send** when your message is complete.

How this appears to your Referring Doctor:

The chat will show like the image below:

To end the chat session, the Referring Doctor can close the **CHAT** window.

Closing Referral Chat in TDO:

To close the **Referral Chat** window, click on the “X” button at the upper right corner. This way, you or staff will not show as available for future chat sessions on the Referring Doctor’s side if you are not actually at the workstation

Note: To ensure that your referring doctor can communicate with you or someone in your office, please have at least one **Referral Chat** window open from one of the staff members' TDO accounts. If no staff members have the chat open, it will show as unavailable for the referring doctor.

Replicated environment

At your secondary location (or any other location besides the primary), the workstation running the Referral Chat **MUST** be able to ping the server on the primary location. If the VPN between locations is set up only for the servers, this will not work. The workstation **MUST** be able to ping the primary server.

This will likely require your IT professional to set up a VPN on the computer using Referral Chat at any location other than the Primary.

If you want to be logged in at different locations at the same time, you must use different login accounts.
