

How to Run a TDO Autofix

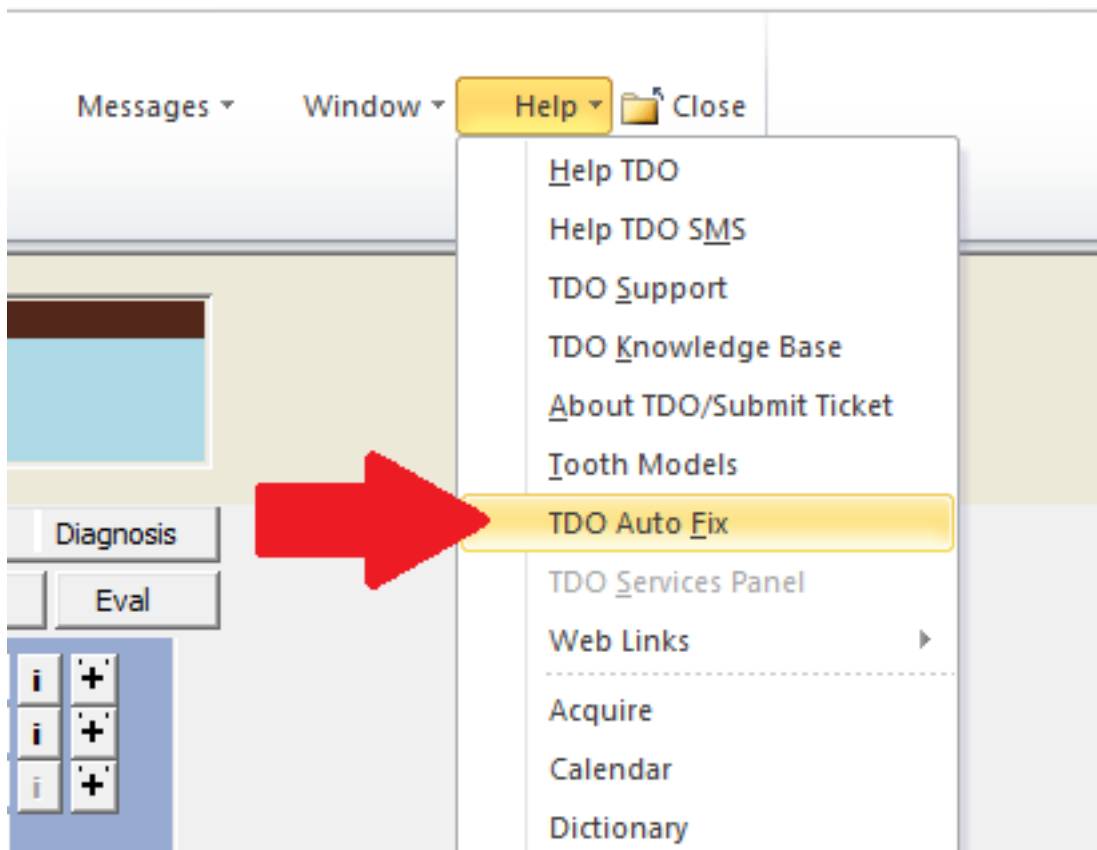

335 [TDO KB](#) October 24, 2023 [Setup](#), [Troubleshooting](#) 15.84K

Running an Autofix

There are two ways to run a TDO Autofix.

If TDO is open

The Autofix can be run by clicking **Help** and selecting **TDO Autofix**

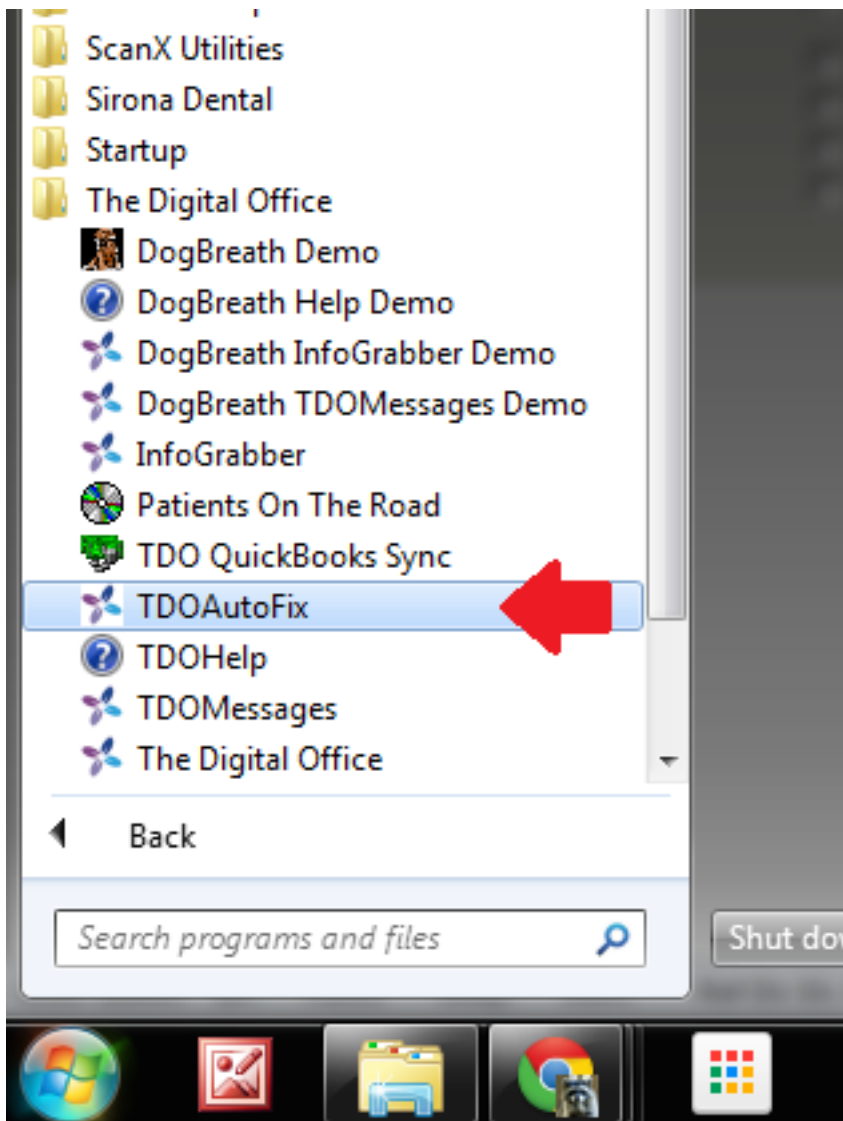

If TDO is closed or not responding

The Autofix can be run by clicking **Start**, followed by **All Programs**

Browse to **The Digital Office**

Click **TDO Autofix**

'Microsoft Jet Database Engine' errors

If TDO is experiencing 'Microsoft Jet Database Engine Error (error #3078)', running Autofix (See steps above) will take care of this error.
