

How to Post a Case on TDO University

705 [TDO KB](#) December 5, 2025 [New User resources](#) 5.48K

Overview

TDO University is a new website developed by TDO Software. The purpose is to give clinicians outside the TDO ecosystem some exposure to how we think, practice, and approach specialty-level cases.

This site is open to anyone with an interest in endodontics, including individuals not currently using TDO.

The site features cases, informative articles, and videos.

Registering for TDO University

To register for TDO University, navigate to the following site: <http://tdouniversity.tdo4endo.com/register/>

After submitting your information, you will receive an email notification to activate your account.

If you intend to post cases directly from TDO Software, make sure that the email you use to register matches the one set in your Edit Control Table area of TDO.

Posting A Case

There are several methods to post a case to TDO University. If you are using TDO Version 12.272a or later, you can post directly from TDO software.

Here is a video showing how to do so:

When you post your case directly from TDO Software, it will match the email address set in your Control Table and try to find the corresponding account on TDO University. Ensure the email address that you register with matches the one set in TDO. If you attempt to post using an email that is not associated with a user on TDO University, the post will be deleted. So please check this before posting.

When posting from TDO Software directly, the case will automatically be uploaded and posted to the site within a minute or so.

If publishing from TDO is not supported in the version you are using, or you are not using TDO Software, you can publish in two other ways.

Here's a video showing that:

This method supports posting videos (from YouTube or Vimeo), Facebook, and Instagram posts.

Reporting a Bug / Feature Requests

As the site is separate from the software, feature requests or bug reporting can be submitted directly on the site. You will need to be logged in to the site to submit bug reports or feature requests. Here is a link directly to that page. <http://tdouniversity.tdo4endo.com/feature-request-report-a-bug/> (External Link)
