

Major iCA Update Announcement Effective July 1, 2019

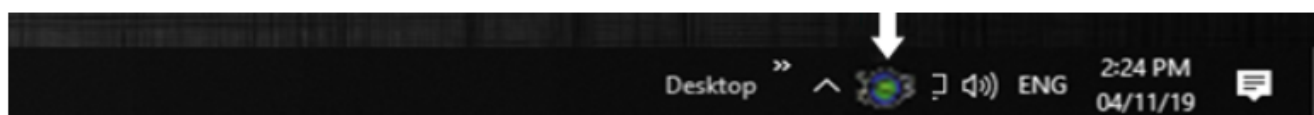

757 [TDO KB](#) September 2, 2025 [Insurance](#), [TDO software](#) 8.31K

Overview

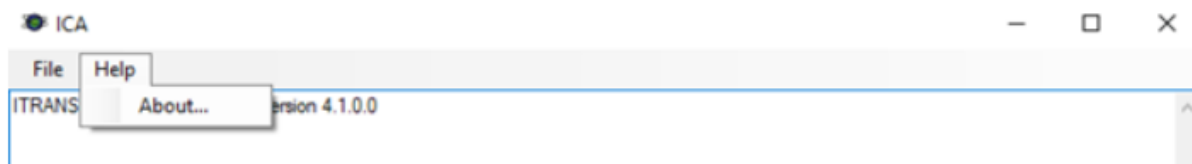

ITRANS has announced a major update for their iCA application. Effective July 1, 2019, you will need to use iCA version 3 or newer (the most recent version, however, is 4.1.0.0). Please see their release [here](#) [External Link].

How to check the version of your ITRANS ICA software

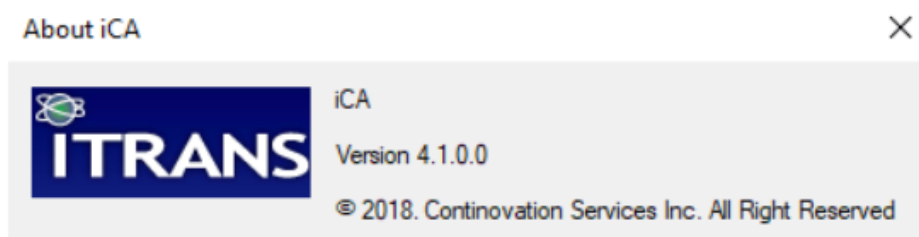

From the computer that's used to send CDAnet e-claims, look for the ITRANS ICA icon running on the taskbar next to the time display (as shown below). Double click on the ICA icon.

The ICA window will appear, click "Help" and then click "About"

A new window will appear displaying the ICA version you are using.

How to install the latest version of iCA
