

Run TDO Without Local Admin (Version 12 only)

765 [TDO KB](#) October 2, 2023 [Setup](#), [Troubleshooting](#) 6.93K

THIS SETTINGS HAVE BEEN TESTED WITH VERSION 12 OF TDO ONLY.

These settings could be setup as a GPO for the office, or individually for each workstation.

1. Remove "run as administrator" option from TDO shortcut.
2. Add "Everyone" user to have read/write to the "tdoffice" Workstation folder. By default should be located here: C:\Program files (x86)\tdoffice
3. Add "Everyone" user to have read/write access to the TDO Registry Trees:
 - a) [HKEY_LOCAL_MACHINE\SOFTWARE\TDO Software, Inc.]
 - b) [HKEY_LOCAL_MACHINE\SOFTWARE\WOW6432Node\TDO Software, Inc.]
4. Remove "run as administrator" option for the TDO Autofix
5. Changes to TDO.exe:
 - a) Automatically add the Runtime reg settings as described in [Multi Windows User TDO Environment](#)
