Multi Tooth Testing overview

78 TDO KB February 23, 2026 New User resources, TDO software 8.32K

Overview

Diagnostic testing is started on the MTI page. You may test one tooth or multiple teeth. You may also test the same tooth / teeth on different dates.

Detailed Instructions

- Click **Multi Tooth Info** tab. Add the teeth you wish to test. To add individually, select the tooth number for the first column and add additional columns by clicking the **+** button. Add a group of teeth by selecting an option from the **Add Group** combo box.
- Input testing information. Select the appropriate choice from the **Auto Fill Tooth info** combo box. This will fill in information for that one tooth.
- Change any information as required. Repeat for all teeth.
- Enter any additional notes at the bottom. You may use the **Select Notes** button to use common phrases.
- Click the **Download** button at the bottom of a column if you wish to add that tooth / information to the patient's chart.
- If you wish to send a report of this information to the referring doctor, notate on the left side of the screen.
- Click **Save Note Summary** if you want a summary of all testing information sent to the patient's notes page.
