Utilizing Courses on TDO University

780 TDO KB February 23, 2026 New User resources 7.76K

Overview

TDO University is a new website developed by TDO Software. The purpose is to give clinicians outside the TDO ecosystem some exposure to how we think, practice, and approach specialty-level cases.

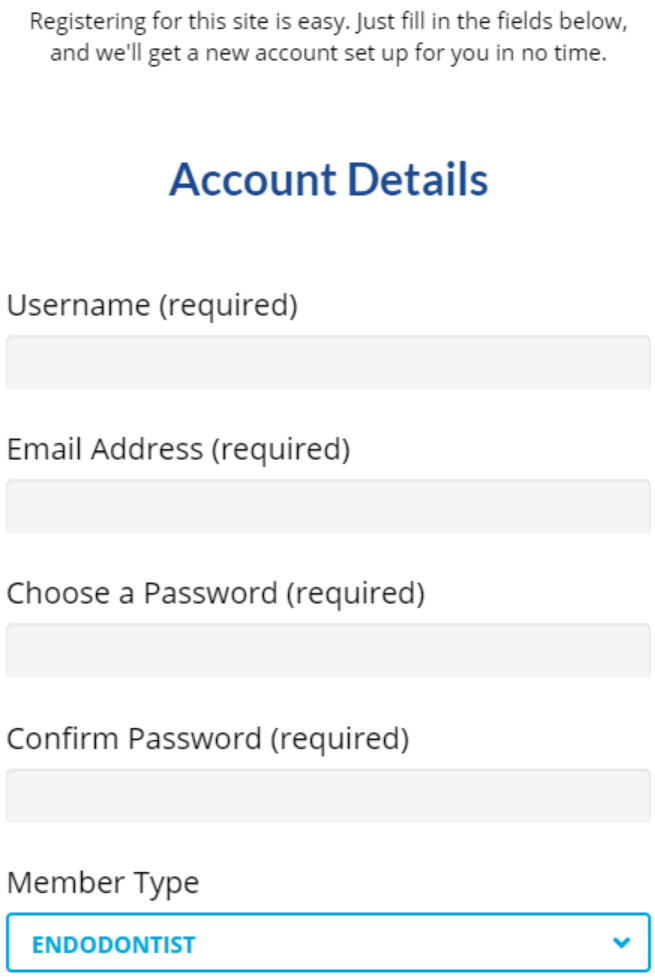

This site is open to anyone with an interest in endodontics including individuals not currently using TDO.

The site features cases, informative articles, and videos. It is also a platform that allows new users to access the training videos.

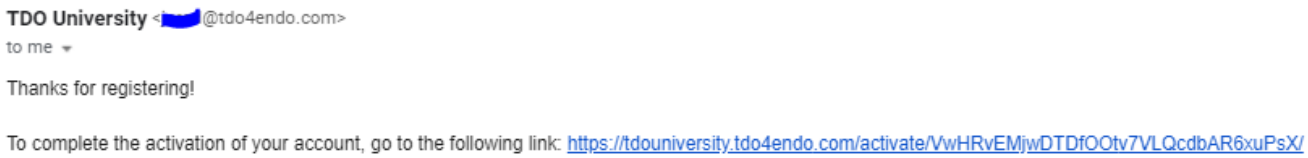

Registering for TDO University

To register for TDO University, navigate to the following site:

http://tdouniversity.tdo4endo.com/register/

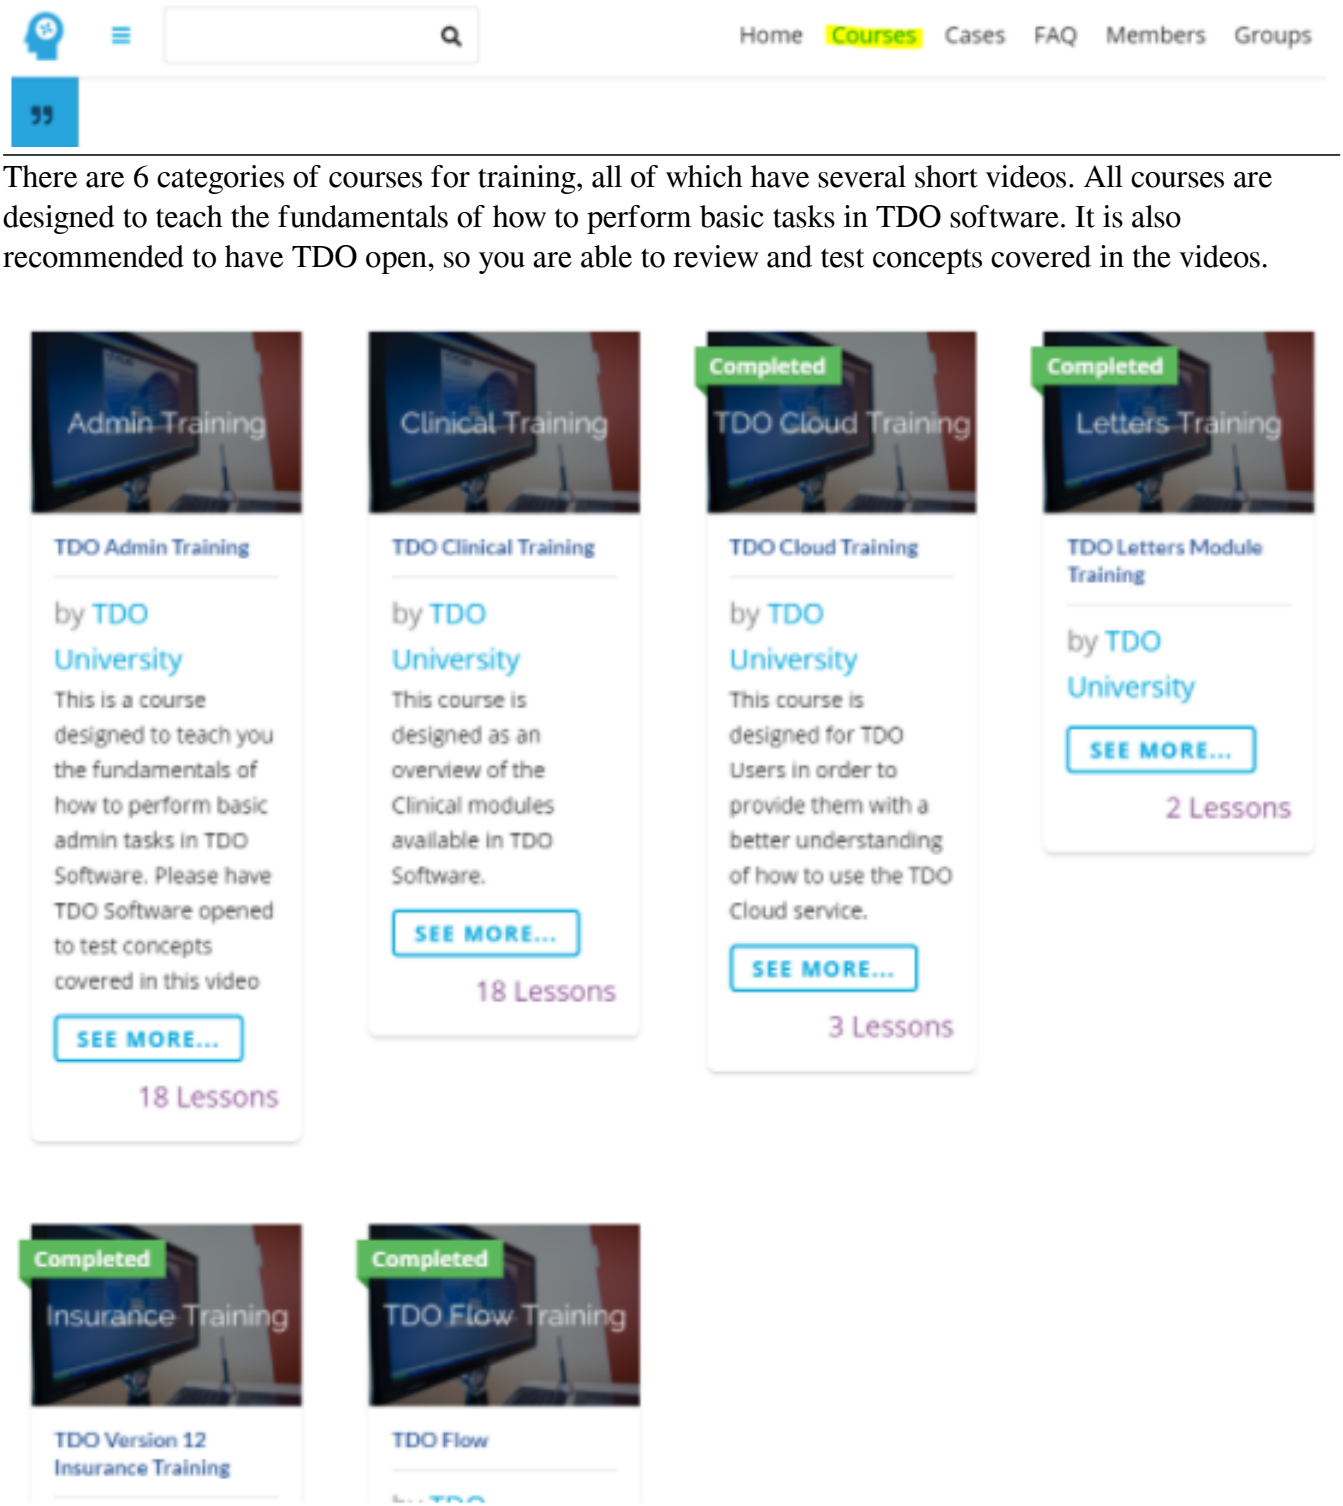

After submitting your information, you will receive an email notification to activate your account.
It is recommended that everyone in the office creates their own unique username and password, this way they can monitor their progress.

TDO University Courses

TDO University also offers training videos listed under “Courses” for new users, the selection of videos is broken down into categories.

It is highly recommended that everyone in the office watches these training videos before training sessions are scheduled.

There are 6 categories of courses for training, all of which have several short videos. All courses are designed to teach the fundamentals of how to perform basic tasks in TDO software. It is also recommended to have TDO open, so you are able to review and test concepts covered in the videos.

After completing each training section, each employee is able to print their certificate of completion. Another reason why each individual must register, it can be helpful to be sure everyone is on the same page and has watched the same videos.
