- Clicking the camera button will automatically open the Acquire window, select the Recall1 category, and, if you have [DSLR Remote Pro installed and integrated with TDO](#), launch DSLR Remote Pro and attempt to take a picture.
- Clicking the tooth button will automatically open the Acquire window, select the Recall1 category, and, if you have configured Digital Radiography in the Control Table (v11:

[Administrative > Edit Control Table > Workstation Settings > Digital Radiography], v12: [Setup > Site Configuration > Edit Control Table > Workstation Settings > Digital Radiography]), initiate taking a radiograph.

- Once the image is taken and saved (Save button) in Acquire, it will automatically show in the Recall Page

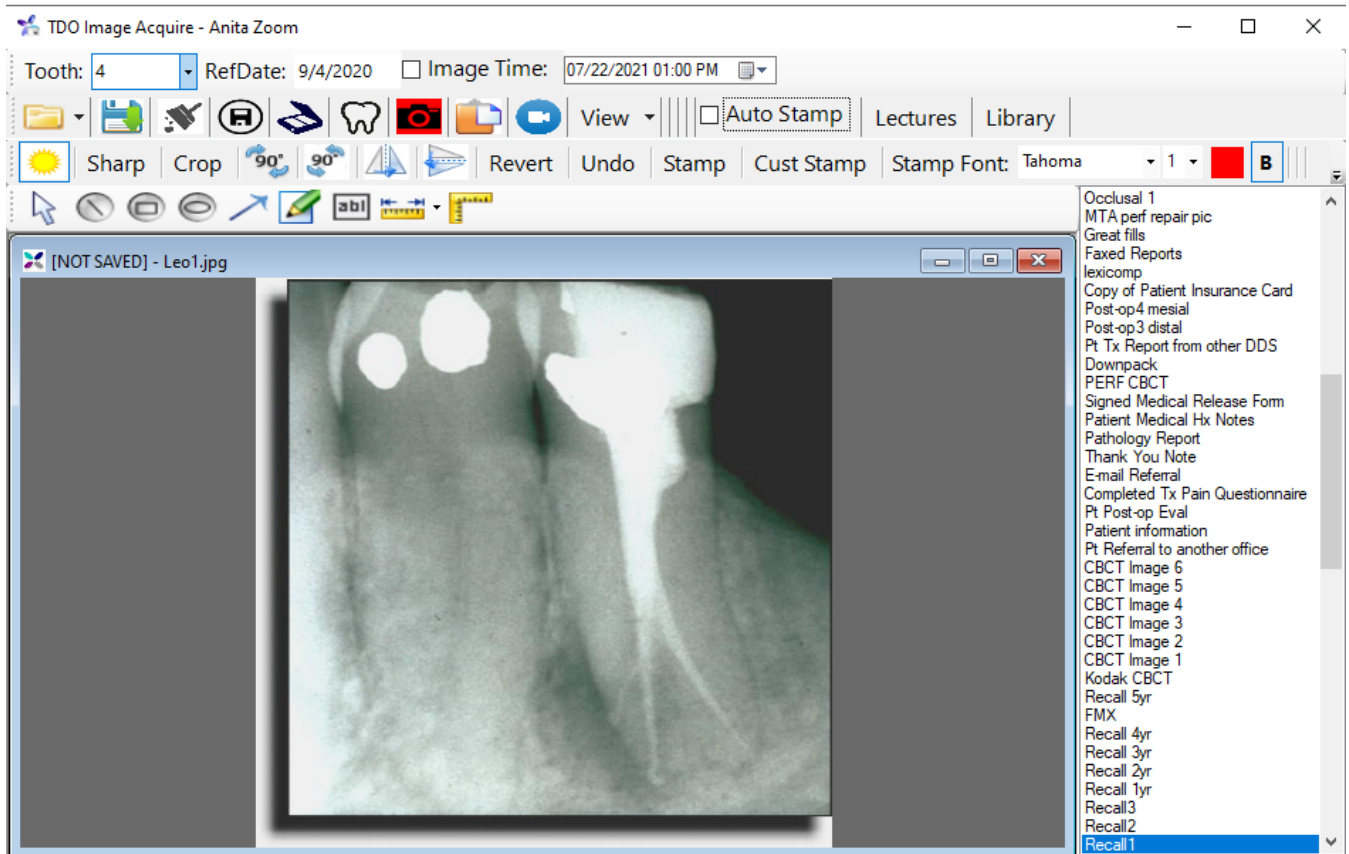

If Provider needs to take another xray or photo for a different tooth that needs recall, this can be done while Acquire page is still open. Please follow the steps below:

- Minimize or move Acquire to select the Main Page on TDO, select the other tooth that needs a recall image to be taken

	Tooth	Initial Date	Doctor	Comp Date	DI	Recall Date	ReportDate	Location
" + "	1	4/6/2021	CARR		0		6/25/2021	TWO
	9	9/17/2020	Doe	1/29/2021	0			TWO
	4	9/16/2020	Doe	1/29/2021	0			TWO
	4	9/4/2020	CARR		0			TWO

- Make sure the info in the Recall page is filled out for that tooth as well

- Since Acquire page is still open, take the xray or photo
- Once the image is taken and saved (Save button) in Acquire, it will automatically show in the Recall Page
