Prescribing Xylitol Rinse and Magic Mouthwash

790 TDO KB November 20, 2025 Electronic Prescribing (eRX) 12.85K

Overview

This article will go over how to send prescriptions for Xylitol Rinse and Magic Mouthwash.

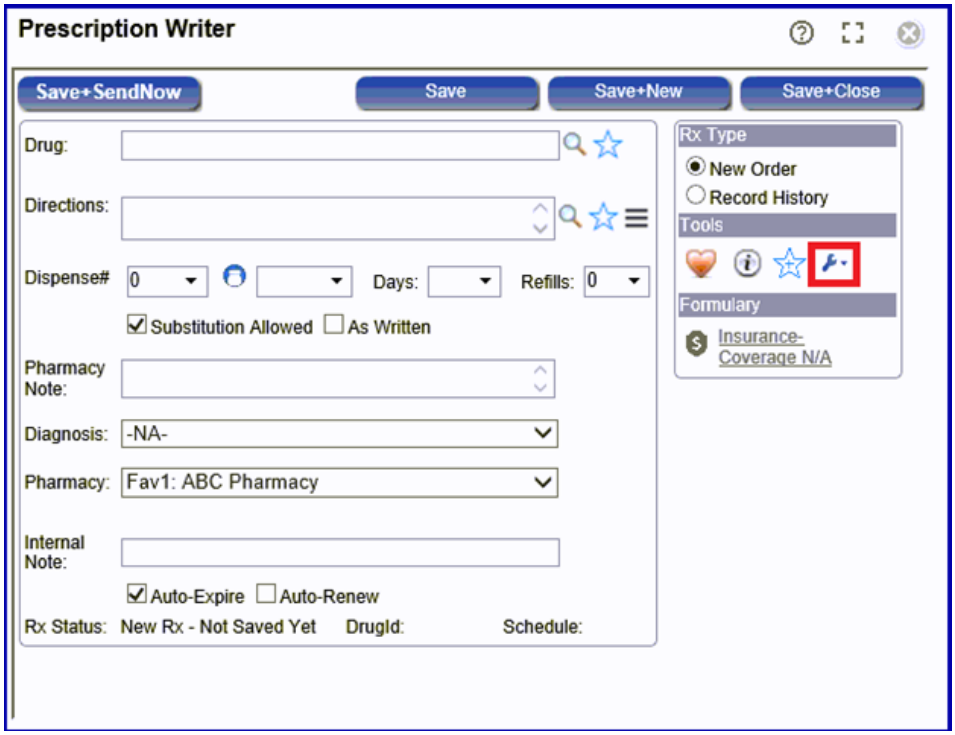

Xylitol Rinse

If entering just xylitol rinse, the proper thing to choose is "**licodaine 2% mucous membrane solution (topical)**".

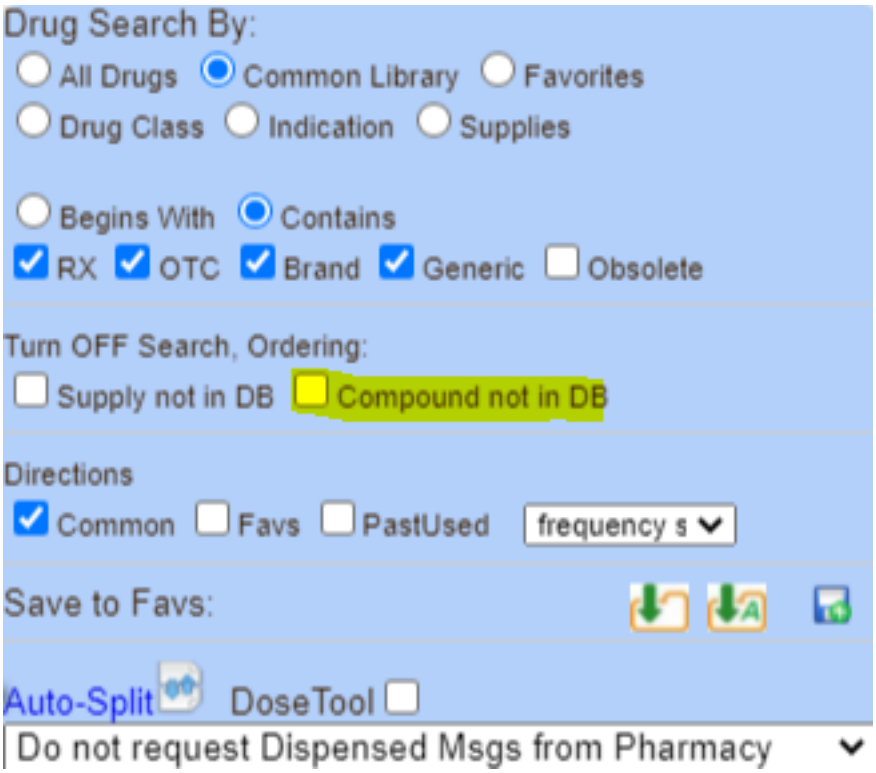

Magic Mouthwash

To prescribe Magic Mouthwash, follow the steps below:

On the Prescription Writer window, click on the blue **'wrench'** icon

Select compound not in DB. This will allow you to enter the compound manually.

If it does not fit you can put the abbreviations in the drug box and then full description in the directions box. If all that information cannot fit in the drug box it will need to go in directions and or pharmacy note.

Always make sure the highest schedule is selected from the prescriptions to ensure it gets sent properly.

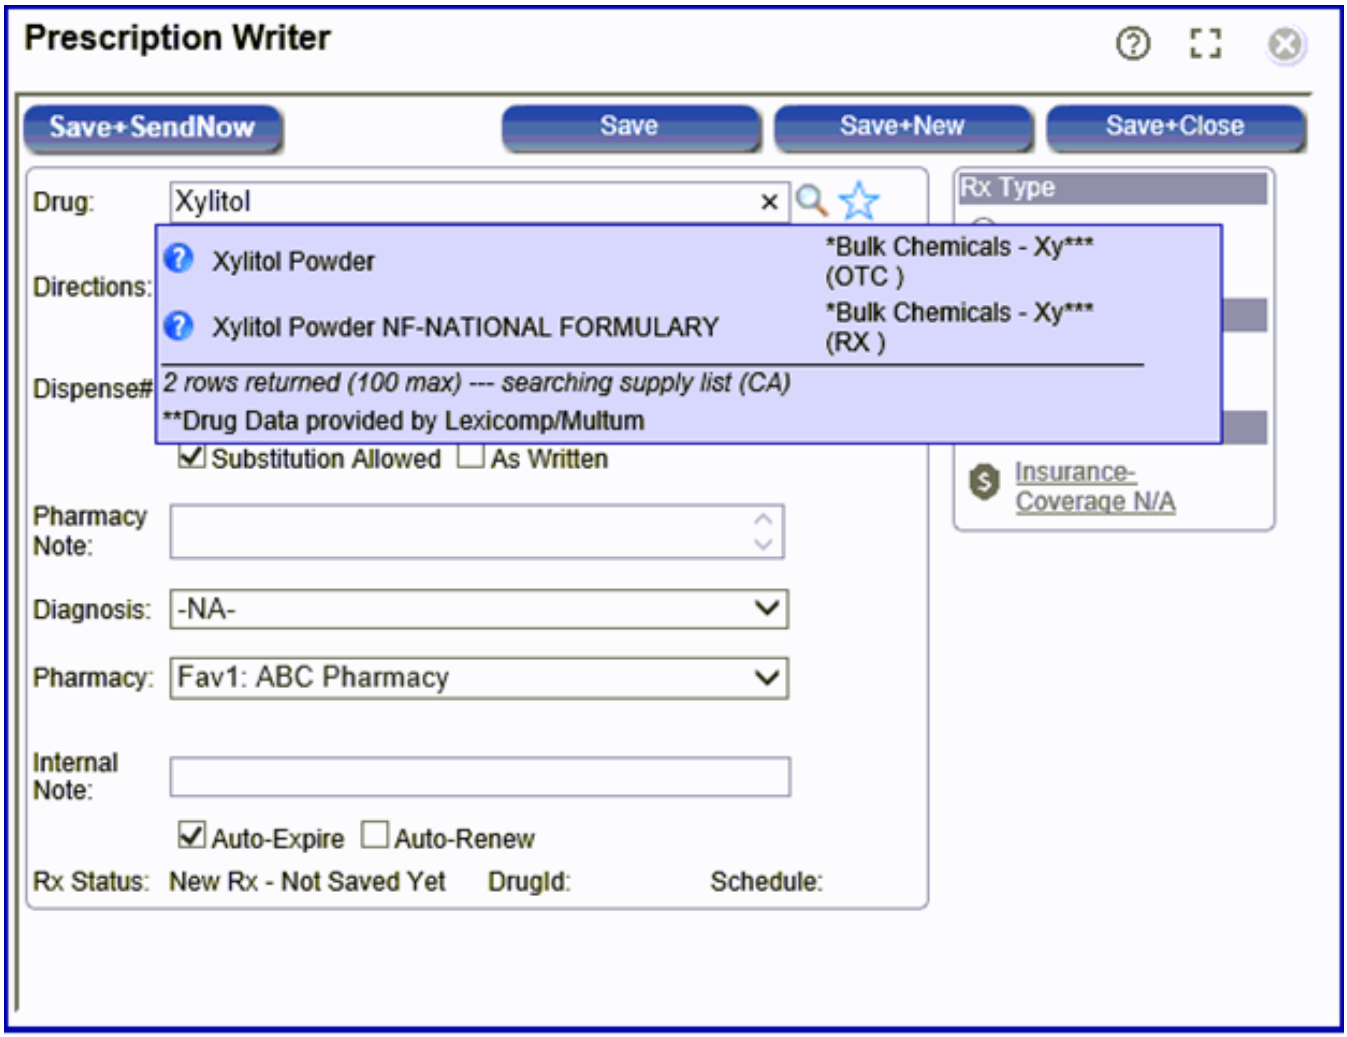

Enter the following Supplies:

Viscous lidocaine 2%: 150 mL
Diphenhydramine 12.5 mg/5 mL: 20 mL
Hydrocortisone (Solu-Cortef): 100 mg
Tetracycline or Doxycycline: 2 g
Nystatin suspension: 20 mL

Directions: **Swish and expectorate 15 to 30 mL every 4 to 6 hours**

Enter Xylitol in the Drug field and 2 options will show: Xylitol Powder and Xylitol Powder NF-National Formulary.

Note: Please save the prescription to (all) prescriber(s) favorite list if prescribed frequently.

Once **'Drug'** is selected, change the search by to **"All Drugs"** that way when the RX Writer opens again its still under **"All Drugs."**
