

Entering Anesthesia on Treatment Page

80 [TDO KB](#) November 26, 2025 [New User resources](#) 4.57K

Overview

How to enter anesthesia on the Treatment Page.

Detailed Instructions

Open the patient's **Treatment page**. Click the “**Anesthesia**” button at the top.

Select the Qty, Type, and name of Anesthesia given. The tooth and date fill in automatically.

If a Quantity or Type of Anesthesia is not showing in the drop-down list, you may add it by clicking the **+** button

This information can be entered faster by using the **autofill** buttons at the bottom.

*A summary of all anesthetics given is entered as a patient note automatically. Any deletions or changes are also documented in the notes, as well as in the **Deleted Anesthesia** report*
