

Letters - adding a QR code

853 [TDO KB](#) September 28, 2023 [Cloud Ribbon Menu](#), [TDO software](#) 7.48K

Overview

It may be useful to add a QR code to printed letters that are mailed out containing a link to a specific website address that you want the recipient to go to.

Examples:

- Invoices sent to patients linking to your online payment portal
- Newsletters sent to referring doctors linking to your website and/or referring doctor login portal

For more information on how to create a QR code, please see our [QR Code Tutorial](#)

Once you have the QR Code saved as an image, all you need to do is add that image to the desired letter template.

Please see this [KB article](#) for how to add images to your letter templates.
