

Recall Tab overview

87 [TDO KB](#) October 30, 2023 [TDO software](#) 5.07K

To open the recall page, click the **Recall** tab in the patient's chart

1. Enter the date for the recall by clicking in the date box. Today's date is entered automatically
2. Specify the recall period (i.e., 6 mos, 1 yr, 18 mo., 2 yr, etc)
3. Answer the recall questions after examining the patient and recall radiograph. You may start with one of the autofills on the top (1, 2, 3)
4. Specify the ultimate finding from the recall results, (i.e., has the case healed or not?)
5. Specify if you want a recall report sent to referring doctor and create the note that should appear on the recall report
6. Enter your recall note and specify the next recall period.

When you are finished with your recall, click the **Generate Summary Note** button if you wish to have a text version of this page entered into the patient notes.

The record selector allows you to page through all the recalls in chronological order.
