

956 [TDOKB1](#) February 29, 2024 [Program Setup](#) 2.29K

Overview

The following article reviews how to add or remove antibiotics from the **Antibiotic Types** list on the long form **Diagnosis page** through the **Setup ribbon menu > Program Setup**.

Where to access: To use this list when working within TDO (not setting up) you can go to **Diagnosis page** > if not already selected, **Long Form** > **Taking Antibiotics** in the bottom right corner.

Table of Contents

- Add to list
- Remove from list

Add to list

- Navigate to the **Setup** ribbon menu
- Select the **Program Setup** dropdown
- Select **Antibiotic type** - this will open a new window
- There are two ways to add to the list...
 - **Option 1:** On the bottom bar of the window to the right of **Record** click the **arrow pointing to the right with an asterisk (>*)** to create a new option record
 - **Option 2:** Scroll to the bottom of the list to the empty entry, there you can add a new option
- Once happy with entry, **Close** to save

Remove from list

- Navigate to the **Setup** ribbon menu
- Select the **Program Setup** dropdown
- Select **Antibiotic type** - this will open a new window
- **Click on the black box to the far left of the row item you want to delete**
- On your keyboard click **Delete** - this will prompt a confirmation window that you'd like to remove the record option, click **Yes** to permanently delete it
